

aM&T - The key to successful energy management
Unlock the energy savings in your business!

09:00 Registration, Exhibition and Refreshments

09:45 Welcome & Introduction from Conference Chairman:

Mark Thrower, Managing Editor, Energy in Buildings and Industry (EIBI)

Unlock the energy savings in your business!

aM&T is fundamental for managing energy use. This session will highlight the systems and approaches you must have, the best practice solutions you should be employing and the reporting you need to generate and create continual energy saving opportunities.

From the meter to the screen. Your guide to aM&T.

ESTAs Metering and Monitoring Group - **aM&T** booklet outlines the tools you need to manage a successful automated monitoring and targeting campaign. This presentation will provide an overview of **aM&T** as it stands and what the future may hold...

Kris Szajdzicki, Chairman, ND Metering Solutions

Board anyone? Building the business case for energy efficiency investment.

How you should tackle energy reduction projects to gain board approval and crucial investment.

John Walsh, Head of Energy Management for UK and RoI, Tesco Stores Limited

Consumer Case Study: Energy in the Public Sector – Spending wisely and maximising return.

Generating continual energy savings across a multi-site operation by understanding site-specific issues and implementing best practice solutions.

Damian Horisk, Divisional Estates Manager, Belfast HSC Trust

Panel Q&A

11:15 Exhibition and Refreshments

12:00 *Making sense of energy efficiency policies*

How will EDR, EED, ESOS, CRC, RHI impact on you and your bottom line? What are the benefits for you, and how can you keep up-to-speed with important developments? Policy makers and influencers provide their views on government initiatives and how demand side participants need to become more involved to ensure a level playing field and balanced outcome.

Electricity Demand Reduction – Our future in your hands.

The Electricity Demand Reduction policy will utilize our increased ability to manage our energy use to provide clear benefit to security of supply in the longer term as well as to relieve shortages in peak demand capacity. DECC EDR Team advises how you can help in the initial pilot.

Charlie Lewis, Head of Strategy, Electricity Demand Reduction, DECC

Smart Meter Implementation Programme – delivering benefits for consumers

Smart metering puts consumers in control of their energy use, helping them save money and paving the way for transformation of the energy market. DECC provides an update on progress with implementing the roll-out of smart metering and the role of energy suppliers, data communication companies and energy service companies in realising that vision.

Jacqui Russell, Head of Consumer Engagement and Roll-out, Smart Meters Programme, DECC

Energy efficiency policies and you

As recent events have proven, Government policies have helped to raise the energy efficiency agenda and have increased board awareness and responsibility. Managing the profusion of such policies is critical to maximising profitability and enabling business growth.

Stephen Barker, Head of Energy Efficiency and Environmental Care, Siemens plc

Panel Q&A

13:15 Exhibition and Lunch

14:15 *How should you evolve your energy strategy?*

Smart technology and automation is increasingly making headlines, but have you adopted the right solutions for your business? Industry experts share their views on why you need to continually evolve your strategy, undertake more data analysis and integrate best practice solutions.

All change on Renewable Heat

The Renewable Heat Incentive is being extended. Find out if your business could be eligible for heating support and how to comply with the new metering requirements. (If you are already applying for the RHI, come and meet the reviewers and get help with your application).

Jacqueline Balian, Head of Operations, Non-Domestic, Renewable Heat Incentive, Ofgem

Enterprise-wide engagement in an age of technology – can it be achieved?

Analysing data, spotting anomalies and implementing solutions from head office is only part of the solution. Encouraging support in energy reduction across your organisation is a challenge, and finding the right solution is vital for maximum engagement and communication.

Ken McCorkindale, Technical Director and Joint Company Founder, Ewgeco

Consumer Case Study: Building a 21st Century energy strategy that can adapt to efficiency pressures and policy opportunities.

Cherry picking energy efficiency solutions provides quick wins in the short term, but generating sustainable reductions over time across all your business processes involves buy-in from all sides. This case study outlines how an informed approach can keep you ahead and how ISO50001 can facilitate best practice to be applied on a global stage.

Graham Cooper, Director and Site Manager, Agfa Graphics

aM&T – your strategy, approach and questions answered

Industry Panel - Members of ESTA's Metering and Monitoring Group (MMG).

16:00 Conference close

16:30 Exhibition close

HOSTED ENERGY CLINICS

45-minute clinics run in parallel with the conference. Hosts will brief delegates on specific and relevant issues and offer potential innovative solutions based on their experience, expertise, products and services.

10.45 *Lisa Gingell, Director, t-mac Technologies Ltd.*

Identifying key energy savings measures through aM&T.

11.45 *Paul Homer, Business Development Manager, Optima Energy Management*

Choosing the right aM&T solution for your business.

12:45 *Richard Hipkiss, Director, digitalenergy*

Application based aM&T, one system – multiple uses. The key to successful energy management.
